

Message from the Managing Director

I imagine most would agree it feels like the end of the year not just the end of the first quarter, based on the amount of activity in the Renewables industry here in Australia. There are many Wind & Solar projects that are progressing and it's also great to hear of several storage projects, including the largest [Solar & Storage Project](#) in SA. We were pleased to participate in the launch of [CleanTek Market](#) which is an online platform to connect development opportunities with financiers and other industry participants.

We've been interviewed a few times lately, including by [Ecogeneration](#), to discuss whether there are enough people to meet the demand in Australia. Our answer is yes though clients will need to be open minded about taking on talent with transferable skills and experience.

Recruitment continues to be busy across Pre-Construction (Developers - Wind and Solar, Finance - Advisory, Equity investing), Construction (Engineers, PM, Contract Management) and Consulting (Principal Engineer level), O&M (Asset Management - Technical and Financial, Engineering, OHS) and Retail (C&I Solar Sales and Installation). We have noticed a trend towards daily rate and fixed term contracts and have therefore created a "Virtual Bench" solution that Owen is now driving.

Our creative guru Dann has created an animated video to explain what we do. It only takes a minute so please check it out. I look forward to catching up with you in the coming Quarter and please say hi if you are at the solar conference this week in Sydney.

Scott Robinson
Managing Director
Phillip Riley

TOP TALENT AVAILABLE

- [Technical Manager - Solar](#)
- [Solar Project Manager](#)
- [Solar Project Manager and Sales](#)
