## Message from the Managing Director

Like most, we are immersed in the festive season and after a busy 2019 are looking to put our feet up for a few weeks, in anticipation of another busy year in Renewable Energy in 2020.

Big industry news for the Quarter would include the [Project Marinus MOU with Ausnet](#), [AEMOs indicative Marginal Loss Factors calculations for FY20-21](#), [the establishment of the Clean Energy Investment Group](#) and [Shell invests in ESCO Pacific for a 49% stake in the business](#).

Congratulations to the ESCO Pacific Team for their hard work, and Shell for a savvy investment.

Recruitment wise, we have seen increased interest levels in other forms of renewable energy & related projects and have kicked off a process to find a Waste to Energy Investment Manager (Contract) for an infrastructure investor. These types of projects have been talked about for years, with very few coming to fruition, so this is an exciting development. We have also seen a spike in Transmission related recruitment and feel that Hydrogen recruitment isn't far away!

Internally, our NSW team have welcomed 2 new team members in [Justine Perry](#) and [Matt Hayes](#), and in Victoria our Contracts Manager, [Erin Kennedy](#), has made the transition from Mining & Resources to Renewable Energy seamlessly.

I hope that you have had a great 2019 and wish you a safe and merry xmas, NY and holiday.

Regards,

**Scott Robinson**  
**Managing Director**
